Ron Klaar  
3105 NE Littler Way  
Vancouver, WA 98662

Dear Ron:

I received your 220C92 letter in which you requested verification of the type of original plating used on the power brake booster and master cylinder cover for the 1969 Z-28 Camaro.

Mr. Gilliland retired earlier this year so I checked with a couple of our resident "know-all's". Their response was:

Power Brake Booster	-	zinc dichromate
Master Cylinder	-	zinc dichromate
Reservoir Cover		(heavy gold [.0002 thick])

Good luck with your interesting project.

Sincerely,

Delco Chassis Division
